156.050-01 *General*

156.050-01A Intent

It is the intent of this Chapter to regulate signs. A permit for the installation of any sign is required unless otherwise provided for in this Chapter. Permits must be obtained from the Zoning Official before installation of any type of sign. Failure to obtain a permit can result in the Zoning Official having the sign removed at the owner's expense. If the owner fails to pay for such removal, the city may attach a lien to the lot on which the sign is located.

156.050-01B Purpose

Signs perform an important function in identifying and promoting properties, businesses, services, residences, events, and other matters of interest to the public. This Chapter regulates all signs within the City of Murray to ensure that they are appropriate for their respective uses, in keeping with the appearance of the affected property and surrounding environment, and protective of the public health, safety, and general welfare. The sign regulations of this Chapter are intended to balance the following differing, and at times, competing goals:

1. To support the desired character of the city, as expressed in adopted plans, policies and regulations;
2. To promote an attractive visual environment;
3. To encourage the effective use of signs as a means of communication for businesses, organizations, and individuals;
4. To provide a means of way-finding for visitors and residents;
5. To provide for reasonable business identification, advertising and communication;
6. To prohibit signs of such excessive size and number that they obscure one another to the detriment of the economic and social well-being of the city and its residents, property owners, and visitors;
7. To protect the safety and welfare of the public by minimizing hazards for motorized and non-motorized traffic;
8. To minimize the possible adverse effects of signs on nearby public and private property;
9. To provide broadly for the expression of individual opinions through the use of signs on private property; and

10. To ensure that the constitutionally guaranteed right of free expression is protected.

156.050-01C *Scope and Applicability*

All signs within the city are subject to the regulations of this Chapter and all other applicable provisions of this zoning code.

156.050-01D *Content Neutrality*

Any sign permitted under this code shall allow the communication of information for commercial and noncommercial purposes without regulating the content, as long as the sign complies with all size, height, and location as well as other applicable requirements of this code and does not bear or contain statements, words, or pictures of obscene or pornographic subjects.

156.050-01E *General Rules for Reading and Applying the Code Language*

Regulations are no more strict than as stated. It will be up to the Zoning Official and/or designee to comprehend the code and apply it. The action of the Code Enforcement Officer is final unless appealed as provided in Section 156.050-12B of this code.

156.050-01F *Hierarchy of Regulations*

Where there is a conflict between a land use regulation, and a structural regulation, or other conflicts not otherwise addressed by this Chapter, the most restrictive applies.

156.050-01G *Severability*

If any word, sentence, section, chapter or any other provision or portion of this Code or rules adopted hereunder is invalidated by any court of competent jurisdiction, the remaining words, sentences, sections, chapters, provisions, or portions will not be affected and will continue in full force and effect.

156.050-02 *Permit Requirements, Procedures, and Fees*

Unless a particular sign is exempt from the permit requirement under an explicit provision of this Chapter or other applicable law, then a permit for such sign is required.

156.050-02A *Replacements*

If any sign is removed and any new sign is erected in its place, a permit shall be obtained the same as if a new sign were erected at a new location, subject to all requirements enumerated herein.

156.050-02B *Maintenance*

If any sign is removed for maintenance and replaced on the same supports, a new permit will not be deemed necessary if the size or type of sign is not changed.

156.050-02C *Relocation of Signs*

If any sign is removed from one location and erected at a new location, a new permit shall be obtained.

156.050-02D *Alteration*

Alteration or enlargement of any sign shall require a permit the same as for a new sign.

156.050-02E Application

No permit shall be granted until and after an application has been filed with the designated Zoning Official, showing the plans and specifications, including dimensions, materials, and details of construction of proposed structure and meeting all provisions of this Chapter.

156.050-02F Application Form

The Zoning Official shall prepare and provide a form to be used as an application for a sign permit. The same form may constitute a permit, when duly approved. Multiple signs may be listed on a single permit only when they are all on the same lot or parcel.

156.050-02G Information on Application

The sign application form may call for disclosure of any of the following information, but not limited to:

1. Name and contact information for the applicant, and if separate, the name, address, and consent of the property owner;
2. Street address;
3. A site plan and/or building elevations showing the location of the proposed sign(s) on the lot and/or building, including setbacks;
4. Detailed sign information including type of construction, method of illumination, dimensions, copy, method of mounting and/or erecting and other similar information (Note: The content of the message or speech displayed on the sign shall not be considered when approving or denying a sign permit, however, the content must be submitted to evaluate the sign copy area). See Section 156.050-01D.

156.050-02H Incompleteness

Initial review of an application will be for the purpose of determining if the application is complete. If the application is found incomplete, written notice thereof will be given within seven (7) business days of submission, detailing the points of incompleteness, provided contact information has been provided. Notice is deemed effective when mailed, emailed, or personally delivered. After notice of incompleteness, the applicant shall have 10 business days in which to resubmit the application, with all noticed items of incompleteness corrected. Upon timely resubmission, a new application fee is not required.

156.050-02I Time for Decision

The Zoning Official shall render a decision on each complete sign permit application within 10 business days of when the application was complete.

156.050-02J Noncompliance with Permit

All signs must conform to the requirements of the permit, and all other applicable laws. Any sign not erected or constructed as represented on the application upon which the permit was issued shall not be construed as a hardship case, but shall be construed as a misrepresentation of facts on the application and a violation of this Chapter. The owner or agent shall be given a two (2) week notice to remove said sign or correct the error. Any noncomplying sign which is not removed or corrected within the required time shall be deemed a public nuisance and a violation of the zoning regulations, and may be abated in the same manner as any public nuisance or zoning regulation violation.

156.050-02K Fees

Upon enactment of this ordinance, future changes of fee schedules will be reviewed and set by the City Financial Committee and City Council.

156.050-11 *Rules of Measurement*

156.050-11A Sign Area

The area of a sign enclosed in a frame or cabinet whether freestanding, monument or wall sign is determined based on the outer dimensions of the continuous perimeter surrounding the sign face. Area = H x W or Area = 3.14 x radius².

Figure 5

156.050-11B Channel (individual) Letter Signs

The area of a sign comprised of individual letters or elements attached to a building wall or window is determined by calculating the area of the smallest geometric figure that can be drawn around the letters and/or elements. Signs consisting of individual letters and/or elements will be measured as one sign. Below is an example of such measuring rules.

Figure 6

156.050-11C Multi-Sided Signs

When the sign faces of a multi-sided sign are parallel or within 10 degrees or 24 inches of parallel, only one side is counted for total sign area. If the sign faces are not parallel or within 10 degrees or 24 inches of parallel, all sign faces are counted for total sign area.

Figure 7

156.050-11D Sign Height

The height of a sign shall be computed as the distance from bottom of the base of the sign at normal grade to the top of the highest attached component of the sign. Normal grade shall be construed to be the average grade level of lot frontage after construction.

Figure 8

156.050-11E Illumination and Luminance

Sign illumination in foot-candles is measured two (2) feet from the sign face. For the purpose of verifying compliance with maximum brightness level limits expressed in “nits”, brightness levels must be measured with the dynamic display set to run full white copy with a luminance meter positioned at a location perpendicular to the sign face center. When taking the luminance reading, the sign face must be the only subject visible in the viewfinder.

156.050-11F Window Area
